### ORIGINAL PAPERS

- 1387 **Recent Decrease in the Difference in Tropical Cyclone Occurrence between the Atlantic and the Western North Pacific**  
Johnny C. L. CHAN and Kin Sik LIU
- 1398 **A Sensitivity Study of Arctic Ice-Ocean Heat Exchange to the Three-Equation Boundary Condition Parametrization in CICE6**  
Lei YU, Jiping LIU, Yongqi GAO, and Qi SHU
- 1417 **Hybrid Methods for Computing the Streamfunction and Velocity Potential for Complex Flow Fields over Mesoscale Domains**  
Jie CAO, Qin XU, Haishan CHEN, and Shuping MA
- 1432 **A Nonlinear Representation of Model Uncertainty in a Convective-Scale Ensemble Prediction System**  
Zhizhen XU, Jing CHEN, Mu MU, Guokun DAI, and Yanan MA
- 1451 **A Modified Double-Moment Bulk Microphysics Scheme Geared toward the East Asian Monsoon Region**  
Jinfang YIN, Donghai WANG, Guoqing ZHAI, Hong WANG, Huanbin XU, and Chongjian LIU
- 1472 **Quantitative Precipitation Forecast Experiment Based on Basic NWP Variables Using Deep Learning**  
Kanghui ZHOU, Jisong SUN, Yongguang ZHENG, and Yutao ZHANG
- 1487 **Influence of Coriolis Parameter Variation on Langmuir Turbulence in the Ocean Upper Mixed Layer with Large Eddy Simulation**  
Dongxiao WANG, Guojing LI, Lian SHEN, and Ye qiang SHU
- 1501 **Effects of Drag Coefficients on Surface Heat Flux during Typhoon Kalmaegi (2014)**  
Lei LIU, Guihua WANG, Ze ZHANG, and Huizan WANG
- 1519 **Energy Paths that Sustain the Warm-Sector Torrential Rainfall over South China and Their Contrasts to the Frontal Rainfall: A Case Study**  
Shenming FU, Jingping ZHANG, Yali LUO, Wenying YANG, and Jianhua SUN
- 1536 **Spatiotemporal Variations of Microwave Land Surface Emissivity (MLSE) over China Derived from Four-Year Recalibrated Fengyun 3B MWRI Data**  
Rui LI, Jiheng HU, Shengli WU, Peng ZHANG, Husi LETU, Yu WANG, Xuwen WANG, Yuyun FU, Renjun ZHOU, and Ling SUN
- 1561 **Seasonal Predictions of Summer Precipitation in the Middle-lower Reaches of the Yangtze River with Global and Regional Models Based on NUIST-CFS1.0**  
Wushan YING, Huiping YAN, and Jing-Jia LUO

### DATA DESCRIPTION ARTICLE

- 1579 **Observed Frequent Occurrences of Marine Heatwaves in Most Ocean Regions during the Last Two Decades**  
Xiaojuan ZHANG, Fei ZHENG, Jiang ZHU, and Xingrong CHEN

### On the cover

In recent years, tropical cyclone numbers have generally increased in the Atlantic Ocean and decreased in the western North Pacific Ocean. In fact, the difference between the former and the latter has actually been positive in four of the years since 2005. For details, please see the paper starting on Page 1387.
