

CONTENTS

EDITORIAL NOTES

- 2135 **Preface to the Special Issue on Changing Arctic Climate and Low/Mid-latitudes Connections**
Xiangdong ZHANG, Xianyao CHEN, Andrew ORR, James E. OVERLAND, Timo VIHMA, Muyin WANG,
Qinghua YANG, and Renhe ZHANG

ORIGINAL PAPERS

- 2138 **The Warm Arctic–Cold Eurasia Pattern and Its Key Region in Winter in CMIP6 Model Simulations**
Liang ZHAO, Yunwen LIU, Yihui DING, Qingquan LI, Wei DONG, Xinyong SHEN, Wei CHENG, Haoxin YAO,
and Ziniu XIAO
- 2154 **A Statistical Linkage between Extreme Cold Wave Events in Southern China and Sea Ice Extent in the Barents-Kara Seas from 1289 to 2017**
Cunde XIAO, Qi ZHANG, Jiao YANG, Zhiheng DU, Minghu DING, Tingfeng DOU, and Binhe LUO
- 2169 **An Extreme Gale Event in East China under the Arctic Potential Vorticity Anomaly through the Northeast China Cold Vortex**
Wei TAO, Linlin ZHENG, Ying HAO, and Gaoping LIU
- 2183 **Impact of the Shrinkage of Arctic Sea Ice on Eurasian Snow Cover Changes in 1979–2021**
Qian YANG, Shichang KANG, Haipeng YU, and Yaoxian YANG
- 2195 **A Cross-Seasonal Linkage between Arctic Sea Ice and Eurasian Summertime Temperature Fluctuations**
Yanting LIU, Yang ZHANG, Sen GU, Xiu-Qun YANG, and Lujun ZHANG
- 2211 **Role of Ocean Dynamics in the Seasonal Hadley Cell: A Response to Idealized Arctic Amplification**
Haijin DAI and Qiang YAO
- 2224 **Influence of Arctic Sea-ice Concentration on Extended-range Forecasting of Cold Events in East Asia**
Chunxiang LI, Guokun DAI, Mu MU, Zhe HAN, Xueying MA, Zhina JIANG, Jiayu ZHENG, and Mengbin ZHU
- 2242 **The Influence of Arctic Sea Ice Concentration Perturbations on Subseasonal Predictions of North Atlantic Oscillation Events**
Guokun DAI, Mu MU, Zhe HAN, Chunxiang LI, Zhina JIANG, Mengbin ZHU, and Xueying MA
- 2262 **The Influence of Meridional Variation in North Pacific Sea Surface Temperature Anomalies on the Arctic Stratospheric Polar Vortex**
Tao WANG, Qiang FU, Wenshou TIAN, Hongwen LIU, Yifeng PENG, Fei XIE, Hongying TIAN, and Jiali LUO
- 2279 **A Parameterization Scheme for Wind Wave Modules that Includes the Sea Ice Thickness in the Marginal Ice Zone**
Dongang LIU, Qinghua YANG, Andrei TSARAU, Yongtao HUANG, and Xuewei LI
- 2288 **Influence of Surface Types on the Seasonality and Inter-Model Spread of Arctic Amplification in CMIP6**
Yanchi LIU, Yunqi KONG, Qinghua YANG, and Xiaoming HU
- 2302 **Evaluation of the Arctic Sea-Ice Simulation on SODA3 Datasets**
Zhicheng GE, Xuezhu WANG, and Xidong WANG
- 2318 **Simulations and Projections of Winter Sea Ice in the Barents Sea by CMIP6 Climate Models**
Rongrong PAN, Qi SHU, Zhenya SONG, Shizhu WANG, Yan HE, and Fangli QIAO
- 2331 **The Arctic Sea Ice Thickness Change in CMIP6's Historical Simulations**
Lanying CHEN, Renhao WU, Qi SHU, Chao MIN, Qinghua YANG, and Bo HAN
- 2344 **Separation of Atmospheric Circulation Patterns Governing Regional Variability of Arctic Sea Ice in Summer**
Shaoyin WANG, Jiping LIU, Xiao CHENG, Richard J. GREATBATCH, Zixin WEI, Zhuoqi CHEN, and Hua LI
- 2362 **Arctic Sea Level Variability from Oceanic Reanalysis and Observations**
Jinping WANG and Xianyao CHEN
- 2378 **Toward Quantifying the Increasing Accessibility of the Arctic Northeast Passage in the Past Four Decades**
Chao MIN, Xiangying ZHOU, Hao LUO, Yijun YANG, Yiguo WANG, Jinlun ZHANG, and Qinghua YANG

On the cover

In recent years, intense Arctic cyclones have become more frequent, leading to increased poleward atmospheric heat and moisture transport, ocean mixing, and sea ice deformation. This, in turn, has resulted in extreme weather and climate events. The special issue, "Changing Arctic Climate and Low/Mid-latitudes Connections", explores the influence of Arctic climate change on mid-latitude climate and weather.
